

Orthoboom[®] SPRING
SUMMER **2026**

Adult Collection

LETTER TO THE CUSTOMER

Dear friends!

We are pleased to present our new Spring–Summer catalog of Orthoboom SS'26 adult orthopedic footwear, inspired by the theme: **“A Big Game: routes, roles, steps.”**

In childhood, play is a way to try things out. In adulthood, it is a way to survive, adapt, enjoy, and change.

Life changes faster than routes on a navigator. Today you are a creator of ideas, tomorrow a neighbor in silence, the day after tomorrow a stair runner at 8:53. But what remains? A step. Movement. Rhythm. And footwear that knows all this by heart.

Orthoboom SS'26 is a collection for those who live mindfully yet move intuitively. For those who build a route not on a map, but by inner impulse. Each model is like a module: flexible, intelligent, adaptive.

Routes, roles, and steps — this is your big game. And we have taken care of its comfort, support, and style.

 **Orthoboom[®]**

We are proud of our footwear!

ORTHOBOOM BIOS COLLECTION

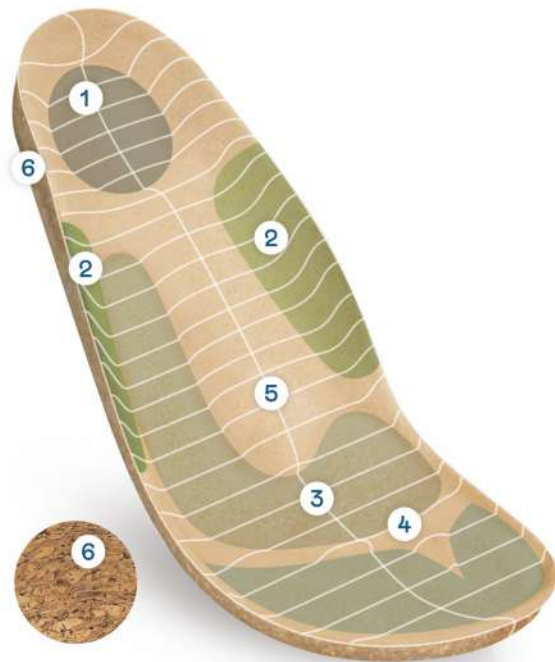

ORTHOBOOM BIOS COLLECTION

Orthoboom Bios orthopedic comfort shoes are a premium high-quality product.

We manufacture Orthoboom Bios footwear from natural, carefully selected and tested materials using an anatomical last that replicates the anatomical shape of the foot. Each pair goes through 15 stages of finished-product processing. Modern design, functionality, the use of first-class materials, and strict quality control in production are what distinguish our orthopedic footwear from that of other manufacturers.

Feel true pleasure and comfort with every step in Orthoboom Bios orthopedic anatomical comfort footwear!

Orthoboom Bios insole:

1. Anatomical heel recess
2. Inner edge support bordered with a rim
3. Metatarsal pad, arch support
4. Toe separator ridge
5. Natural velour on the insole
6. Natural cork outsole

ORTHOBOOM COMFORT / SANDALS

ORTHOBOOM COMFORT COLLECTION

Orthoboom Comfort footwear is used for the following conditions and deformities:

- Static insufficiency of the foot and flat feet.
- Calluses and corns on the plantar surface of the feet, as well as heel spurs.
- Hallux valgus deformity of the big toe.
- Hammer toe deformity.
- Signs of varicose vein disease in the legs.
- Static load on the legs for more than 4 hours a day (especially recommended for professions where the workday is spent “on your feet”).
- Pregnancy.
- Excess body weight.
- Previous leg and spinal injuries.
- For comfortable walking and absence of leg fatigue throughout the day.

Purpose:

- Prevention of progressive foot deformity.
- Redistribution of load on the foot in order to reduce pain and fatigue.

FLORAMA — Comfort line. Natural accent.

ORTHOBOOM COMFORT / SNEAKERS

PROFILED ARCH-SUPPORTING INSOLE

- Consists of several layers of foamed material of different densities and firmness, allowing optimal distribution of properties by zones.
- Inserts for the inner and outer arches and a profiled heel bed promote the correct heel position and help prevent longitudinal flat feet and valgus heel alignment.
- The ShockAbsorber heel cushion reliably protects the heel from impact loads.
- The top layer of the insole is made of a lightweight washable textile material resistant to abrasion.

CUSHIONING INSOLE

WITH INSERT PROFILE

Sneakers from the new collection provide excellent comfort and stability thanks to an innovative cushioning insole with a massage effect and an insert profile.

The insoles help soften pressure points and promote correct foot positioning, reducing discomfort and improving the overall condition of the feet, which is especially beneficial for people with plantar fasciitis.
